

ESA Cloud CCI – Final Meeting Phase 1

11 - 13 November 2013
held at DWD, Omega-Building, Offenbach, Germany

Agenda

Monday, 11 November Cloud colloquium		
13:00	Welcome Address, organisational issues	Rainer Hollmann
13:15	The role of clouds in the climate system, their radiative effect and feedback – Reviewing the current AR5	Johannes Quaas (LIM)
14:00	Using Optimal Estimation Theory for retrieving cloud properties from passive imagers – Advantages and difficulties	Phil Watts (EUMETSAT)
14:45	<i>Coffee break</i>	<i>All</i>
15:30	Using COSP simulator approach to evaluate climate models – Examples and requirements for new observational datasets	Alejandro Bodas-Salcedo (UKMO)
16:15	Reviewing the results of Cloud CCI Phase 1 - Developing Cloud CCI retrieval schemes - Evaluating the Cloud CCI prototype dataset - Reports and feedback from climate research team of Cloud CCI	Rainer Hollmann (supported by - Caroline Poulsen and Cintia Carbajal Henken - Stefan Stapelberg and Rasmus Lindstrot - Claudia Stubenrauch and Ulrika Willén)
17:15	Discussion	All
